INDEX.

PAGE

ALLARDICE, R. E.

On some Theorems in the Theory of Numbers, . . 16
On a Property of odd and even Polygons, . . 22
On some Properties of the Quadrilateral, . . 27
On a Problem in Permutations, ... 64
Note on Menelaus's Theorem, ... 92

CAYLEY, Professor.

Note on the Orthomorphic Transformation of a Circle into itself, ... 91

CHREE, CHARLES.

On the Equations of Vortex Motion, with special reference to Polar Co-ordinates, . . . 43

DOUGALL, JOHN.

On a certain Expression for a Spherical Harmonic, with some Extensions, ... 81

ELLIOTT, Professor.

On a Hydromechanical Theorem, . . . 69
On Rankine's Formula for Earth Pressure, . . 77

GIBSON, GEORGE A.

Green's and allied Theorems: A Historical Sketch, . 2

MACKAY, J. S.

Some new Properties of the Triangle, . . . 5
Historical Notes on a Geometrical Problem and Theorem, ... 93

MORRISON, J. T.

A Method of Teaching Electrostatics in School, . 89

PAGE

OFFICE-BEARERS, ... 1

PINKERTON, R. H.

Note on Normals to Conics, ... 19

SPRAGUE, T. B.

On the possible non-linear Arrangements of Eight Men on a Chess-Board, ... 30

STEGGALL, Professor.

A Special Case of Three-Bar Motion, ... 5

TAIT, Professor.

Note on a Curious Operational Theorem, . . 21

An Apparatus which gives the same Curve as a Glissette, either of a Hyperbola or an Ellipse, [Title] 29

Quaternion Synopsis of Hertz' View of the Electro-dynamical Equations, [Title] 92

THOMSON, Professor.

On the Moduluses of Elasticity of an Elastic Solid according to Boscovich's Theory, ... 29

Note.—The Committee desire to express their indebtedness to T. B. SPRAGUE, Esq., for a liberal donation, which has enabled them to print the figures to Professor Steggall's paper.
